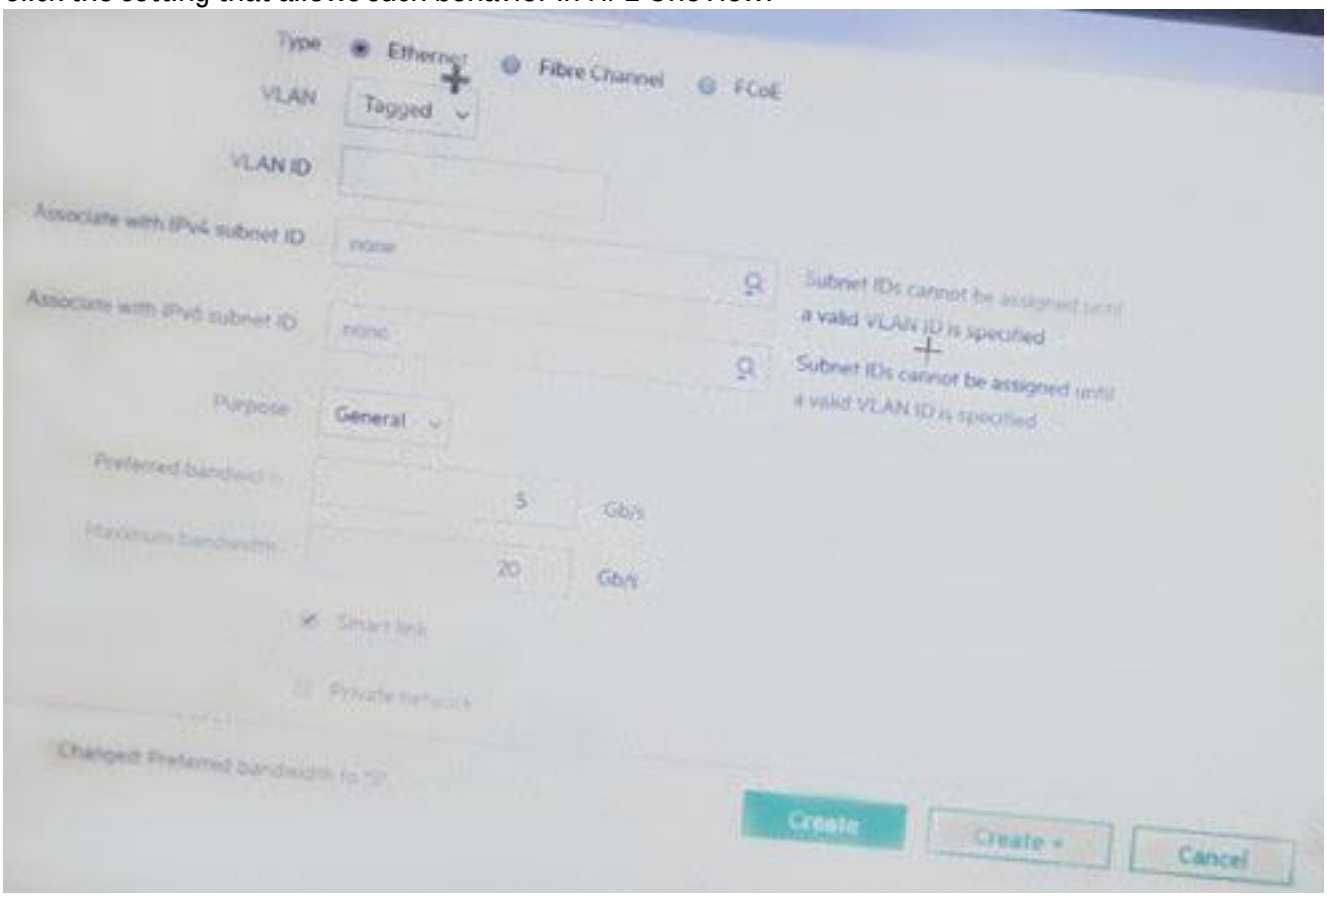
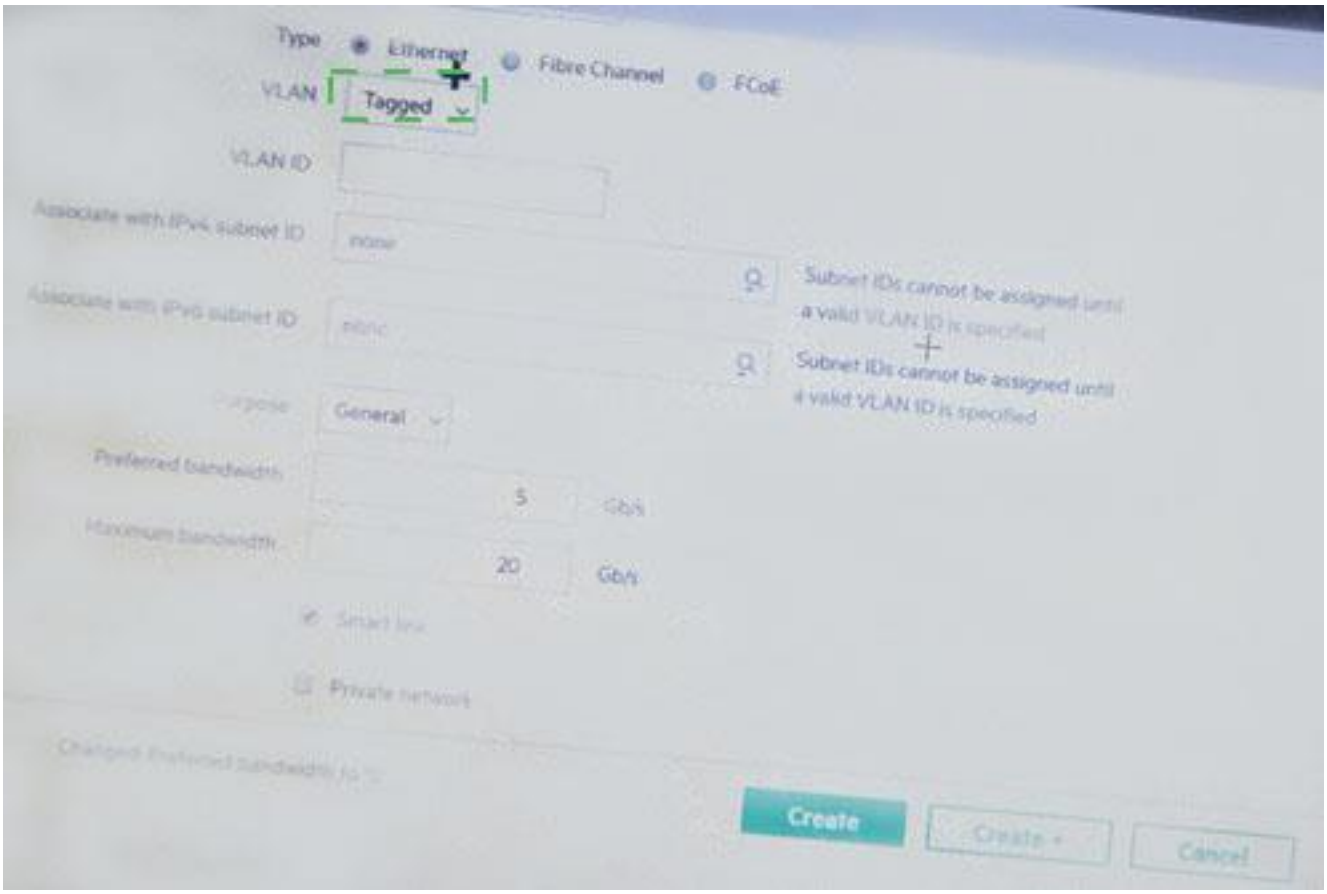
NO.1 In addition to the REST client what is another way to access the HPE REST APIs? (Select two.)
A. cURLcormand line utility
B. Unified Extensible Firrwate Interface (UEFI)
C. Windows PowerShell D Native BASH Linux shell
D. PuTTY client
Answer: A,C

NO.2 A system administrator is HPE OneView network for a VMware server farm.
The administrator requires an environment adding a new VLAN to an upstream switch and VMware vSwitch does not require a change at the Virtual Connect level regardless of the number of used VLANs.
Click the setting that allows such behavior in HPE OneView.



Answer:



NO.3 You need to remove 25 unassigned Server Profiles from HPE OneView. What's the most efficient way to accomplish this?

A. Use REST API with the DELETE method

B. Select the Server Profile Template for each server and click "Delete" from the "Actions" menu

C. Use REST API with the POST method

D. Edit each Server Profile and change the Server Profile Template to "none"

Answer: A

NO.4 You assign a server profile to an existing BL Gen 8 server within a managed enclosure with Affinity set to
"Device Bay + Server Hardware". What would happen if you replace the server in the enclosure with a new BL Gen 10 server hardware resource?

A. It will apply the profile if a server with the correct serial number installed.

B. It will prevent the profile if the server is configured with Secure Boot mode in the BIOS.

C. It will prevent the profile from being applied if a different server is inserted to that bay.

D. It will apply the profile if the correct server hardware type is installed.

Answer: B

NO.5 A customer has an HPE oneview Synergy Environment with various compute modules. They want to ensure that a server profile is only applied if a server with a specific server hardware type and a serial number is inserted in to predefined slot.
When creating a server profile template, which settings is critical to ensure the intended behavior?

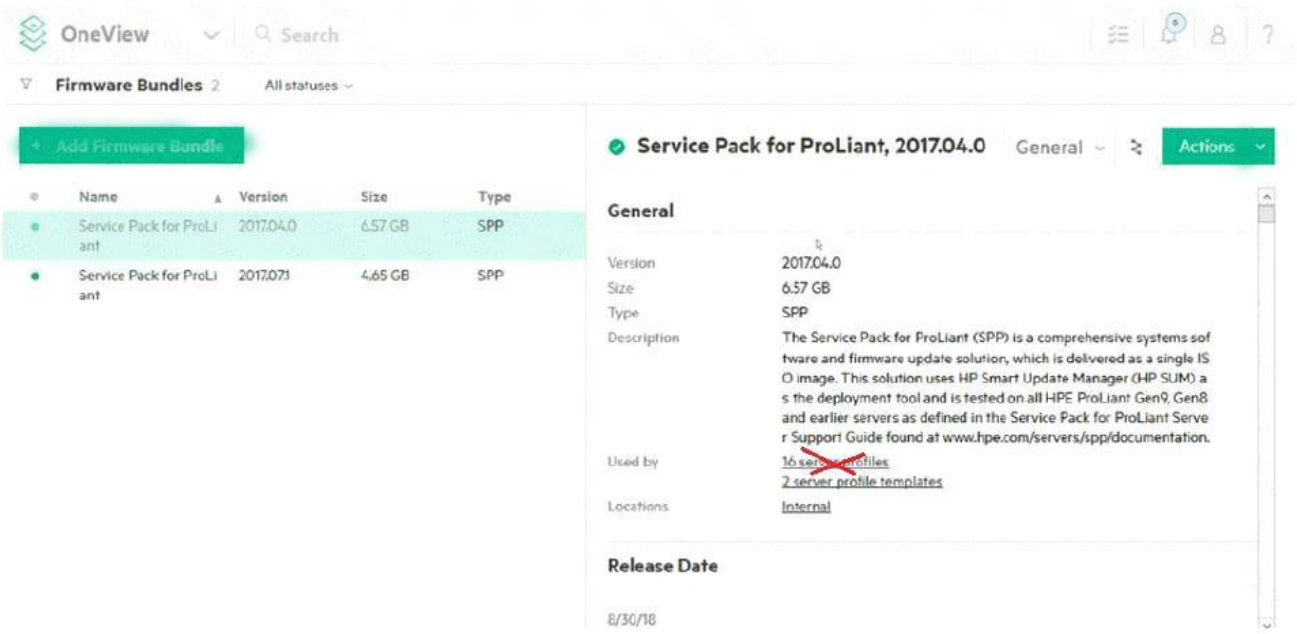
A. Affinity set to "Server hardware type + serial Number "
B. Affinity set to" server hardware type"
C. Affinity set to "Server Device Bay"
D. Affinity set to "Device bay + Server Hardware"
Answer: D

NO.6 An administrator wants to create new volumes using a server profile. What limitations must the administrator consider?
A. Creating shared volumes using server profiles is possible only with Flat SAN implementation.
B. Volumes created through the server profile cannot be bigger than 1T
C. A volume template must be used to create new volumes using server profile.
D. Only private volumes can be created through a server profile.
Answer: D

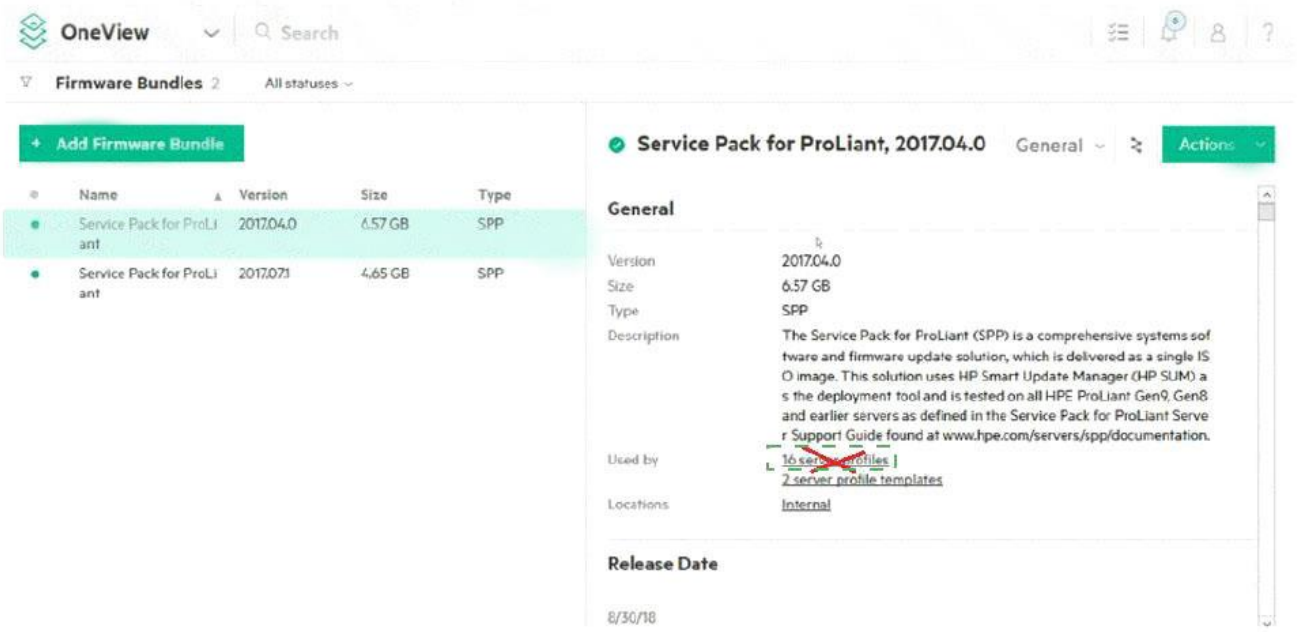
NO.7 You want to create a Support Dump file using REST: How would you accomplish this?
A. POST /rest/backups/support-dumps
B. PUT /rest/appliance/support-dumps
C. GET /rest/appliance/support-dumps
D. POST /rest/appliance/support-dumps
Answer: D

NO.8 An administrator is configuring a server profile template, but does not see the Ethernet network called "VLAN
210" that had been created earlier. What could be the cause?
A. VLAN 210 is already in a Network Set.
B. VLAN 210 was never configured in the Logical Interconnect Group.
C. VLAN 210 has Private Network enabled.
D. VLAN 210 does not exist on the upstream switches.
Answer: D

NO.9 Click where the server administrator can see the server profiles using the selected firmware Bundle.



Answer:



Explanation
16 server profiles

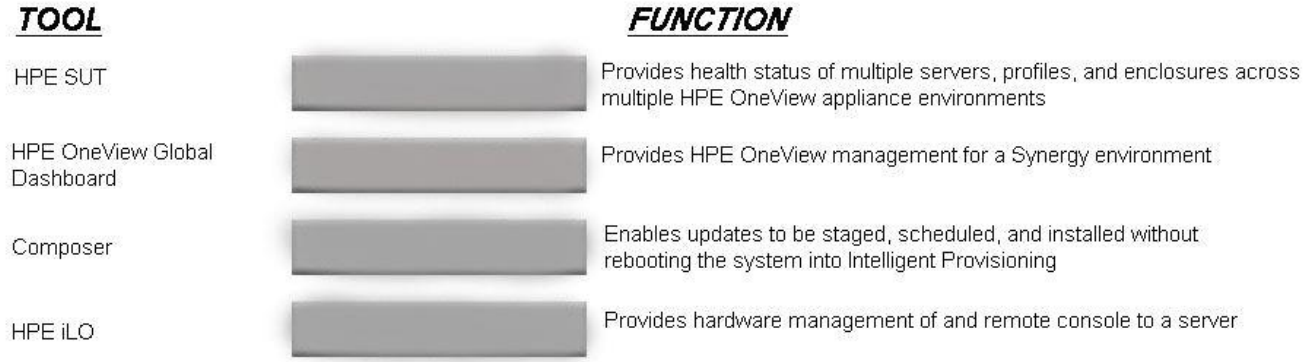
NO.10 Which license is required to remotely access the DL server console and event logs?
A. HPE OneView Advanced
B. Insight Remote Support
C. Global Dashboard
D. iLO Amplifier pack
Answer: D

NO.11 A customer is interested in monitoring the hardware health of server blades in a c7000 enclosure equipped with Comware switches, and also wants to use iLO remote console. Which licensing option can you recommend as the lowest price level?

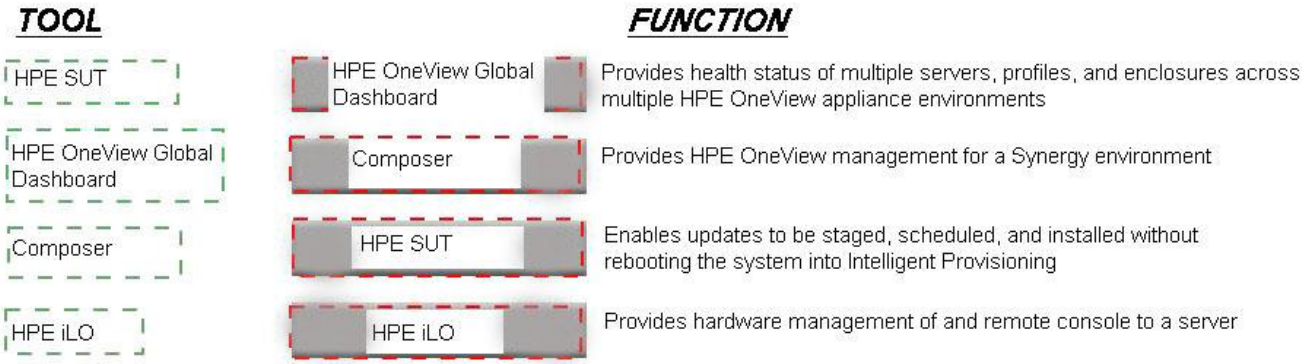
A. HPE OneView Advanced with iLO Advanced
B. HPE OneView Standard and iLO Advanced
C. HPE OneView Standard and iLO Standard for BladeSystem
D. HPE OneView Advanced without iLO Advanced
Answer: A

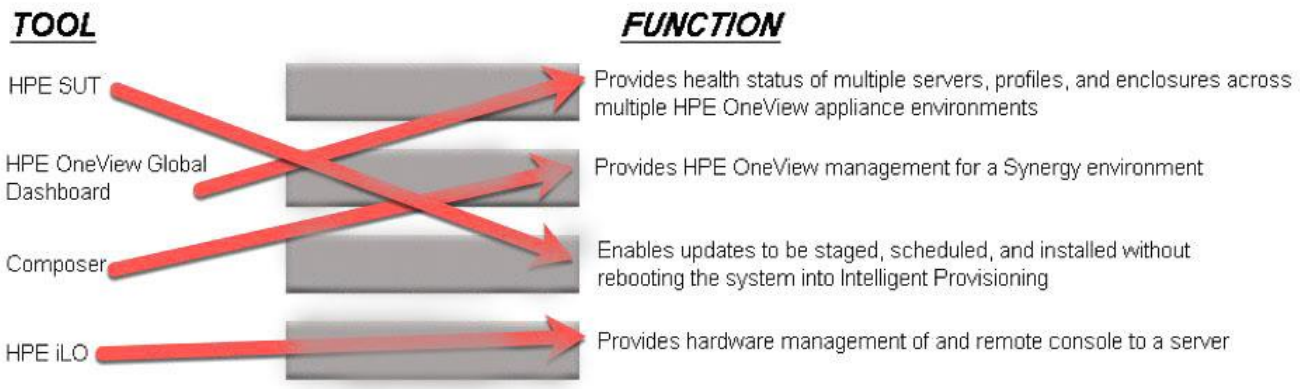
NO.12 Which component of HPE OneView provides information about temperature and CPU utilization for managed resources?
A. metric streaming message bus (MSMB)
B. state change message bus (SCMB)
C. insight online (IO)
D. integrated lights out (iLO)
Answer: B

NO.13 Match the HPE management tools to their function.



Answer:





NO.14 Your customer temporarily has to move the profile from a BL460C Gen9 machine to a BL460C Gen10. What does the customer have to do to complete this task?
A. disable hardware validation when assigning the server profile to the new server
B. check "force installation" option when assigning the server profile to the new machine
C. edit the server profile and change the server hardware type
D. delete Gen9 profile and crate a complete new server profile specific to Gen10
Answer: D

NO.15 Which statements about hypervisor cluster profile are true? Select two.
A. There can only be one type of hypervisor in the cluster
B. The type of hypervisor used will be detected automatically
C. Hypervisor cluster profiles can only be used with hpe synergy image streamer
D. A hypervisor cluster profile needs a server profile template
E. A hypervisor cluster can be expanded but cannot be shrunk.
Answer: A,D

NO.16 An administrator needs to restore an appliance that was recently updated. What does the administrator need keep in mind regarding restoring from a backup?
A. The appliance cannot be restored from a backup older than 180 days.
B. The appliance can be restored only from the maintenance console.
C. An appliance can only be restored from a backup created on an appliance of the same version.
D. A successful appliance restore requires the password configured during backup.
Answer: C

NO.17 Your customer would like to manage HPE BladeSystems and some rack servers using HPE OneView and is concerned about system availability. How should you respond to this concerned customer?
A. HPE OneView has a built-in high availability mechanism that can be enabled with an additional license
B. HPE OneView can be deployed to a hypervisor cluster to provide high availability
C. HPE OneView can be connected to two different databases to provide high availability
D. HPE Global Dashboard can be used to enable HPE OneView high availability

Answer: B

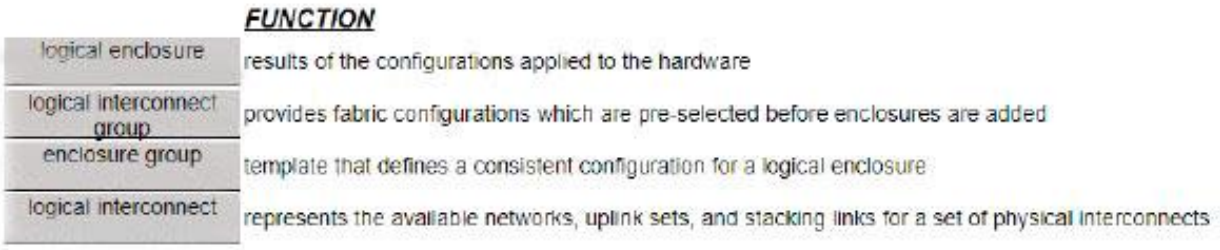
NO.18 Match the HPE OneView element to its function.

Element	Function
enclosure group	conceptual view of a single enclosure within a group.
logical enclosure	provides fabric configurations which are pre-selected before enclosures are added.
logical interconnect	template that defines a consistent configuration for a logical enclosure.
logical interconnect group	represents the available networks, uplink sets, and stacking links for a set of physical interconnects.

Answer:

Element	Function
enclosure group	conceptual view of a single enclosure within a group. → logical enclosure
logical enclosure	provides fabric configurations which are pre-selected before enclosures are added → logical interconnect group
logical interconnect	template that defines a consistent configuration for a logical enclosure. → enclosure group
logical interconnect group	represents the available networks, uplink sets, and stacking links for a set of physica interconnects. → logical interconnect

Element	Function
enclosure group	conceptual view of a single enclosure within a group. → logical enclosure
logical enclosure	provides fabric configurations which are pre-selected before enclosures are added → logical interconnect group
logical interconnect	template that defines a consistent configuration for a logical enclosure. → enclosure group
logical interconnect group	represents the available networks, uplink sets, and stacking links for a set of physica interconnects. → logical interconnect



NO.19 Which security feature would you configure to delegate responsibility for a subset of resources to a junior administrator group?

A. SBAC (Scope Based Access Control)

B. No Password for admin account

C. CLI Only Access

D. RBAC (Role Based Access Control)

Answer: A

NO.20 An administrator needs to customize the BIOS and local RAID configuration for a collection of HPE ProLiant servers. What should the administrator use to accomplish this task?

A. Server hardware

B. Smart Start Scripting Toolkit

C. Server Profile Template

D. Global Dashboard

Answer: D
